

# ABC Order

Intuitive pharmacy solution for all your purchasing and reporting needs

**ABC Order provides a logical workflow and one-stop-shop functionality for your pharmacies.** The platform is created hand-in-hand with pharmacists, buyers, pharmacy directors, operations managers, 340B coordinators and technicians to offer you a sophisticated yet easy-to-use ordering tool. ABC Order enables a seamless purchasing experience through smart capabilities for integrated ordering, savings tools, and reporting. Explore the power of analytics to minimize your costs and maximize efficiencies. Now you can spend your time on what matters most – patient care.

**All day login** during business hours and **streamlined order collaboration** across multiple users

**Robust search** with filtering for relevant and up-to-date drug and pricing information

**Simple, user-friendly dashboard** offers

- real-time delivery status
- streamlined ordering data
- important updates and notifications

**Optimized ordering decisions** to align purchases with AB's preferred formulary, PRxO Generics, by easily identifying contract compliance opportunities

**Real-time management of exceptions and customer support** lets you initiate returns, claims, request labels/pricing stickers, and resolve technical issues

The screenshot shows the ABC Order dashboard for 'MY LOCAL PHARMACY'. The account number is WAC 0100093834. The dashboard is divided into three main sections: Orders (4), Support Services (4), and Products (2). The Orders section contains four items, each with a status (e.g., 'Confirmed with Exception(s) Today'), a description, and a 'View More' link. The Support Services section contains four items, each with a status (e.g., 'MRA Available Today'), a description, and a 'View More' link. The Products section contains two items, each with a status (e.g., 'Order Reminder Today'), a description, and a 'View More' link. A 'Delivery Status' indicator shows 'Delivery is on time and estimated to arrive at 3:15PM'. The top navigation bar includes 'Browse By Category', 'Tools', 'Support Services', and a search bar. The bottom right corner has 'Help' and 'Cart' buttons.

**Efficient inventory management** through setting alerts and availability notifications for irregular products. Create notes for products requiring specific ordering procedures
