## We make navigating own use programs simple

Taking advantage of own use savings can feel complicated and even risky. That's why you need the right partner. Our team of experts breaks down the complexity and provides comprehensive support to simplify own use purchasing and help you capitalize on the right opportunities.

**We combine smarter business intelligence and end-to-end services that provide an easy pathway to build, implement, and maintain a highly functioning and compliant own use program that benefits you and your patients.**

### Our solution helps:

---

#### **Identify opportunities with robust business intelligence and smarter insights**

Our proprietary analytics combined with innovative business intelligence tools filter purchasing data to provide targeted insights for savings maximization and internalization.

#### **Mitigate risk with proven compliance strategies**

The success of your program relies on your confidence to operate it safely and effectively. We've developed an end-to-end policy, procedures, and compliance package aimed at mitigating potential risks at every point in the process.

#### **Build a comprehensive program with dynamic support options**

From pro-forma development to pharmacist-led consulting, our dynamic support model guides your health system through all aspects of building a sophisticated own-use program and beyond.

#### **Promote progressive purchasing improvement with ongoing advisory services**

Our ongoing advisory services leverage our business intelligence and tailored opportunity dashboard to help your pharmacy buyers identify own use-eligible products and optimize class of trade purchasing for progressive improvement.
